

Colon carcinoma diagnosed in Finland 1975-1994 (follow-up to 1995)

Life table estimates of patient survival using period analysis

Period window is from 1 Jan 1994 until 31 Dec 1995

Standard errors calculated (incorrectly) using the actuarial method

Sex=Male

Interval	L	D	Person-time at risk (using exact times)	Interval- specific observed survival	Standard error of P	Cumulative observed survival	Standard error of CP	Interval- specific expected survival	Cumulative expected survival
0.0 - 1.0	362	23	264.5	0.9167	0.0145	0.9167	0.0126	0.9464	0.9464
